## KIKIOLAOLUWA ADENIRAN

### OBJECTIVE

**Frontend / Mobile Development Intern** experienced in building responsive mobile and web interfaces with **React** and **React Native**. Delivered production-ready projects including a **React Native notes app**, **expense tracker**, and **React-based Netflix clone**, showcasing strong **component architecture**, **state management**, and **UI polish**. Effective at **debugging UI issues**, **refactoring for maintainability**, and shipping **clean, user-first mobile experiences**.

### SKILLS & ABILITIES

React Native · React.js · JavaScript · TypeScript · API Integration · Tailwind CSS · HTML/CSS · Git & GitHub · Google Lighthouse (Performance & SEO)

### EXPERIENCE

#### **Frontend Engineering Intern — Rex Health (Remote)**

*June 2025 – September 2025*

- Maintained and enhanced the company's **mobile application UI** using **React**.
- Debugged and resolved **UI inconsistencies**, layout issues, and component rendering bugs.
- Implemented **responsive, visually consistent designs** with **Tailwind CSS** across device sizes.
- Refactored existing screens under supervision to improve **readability, maintainability**, and adherence to design standards.

#### **Frontend Engineering Intern — Codveda (Remote)**

*September 2025 – October 2025*

- Built **responsive web interfaces** using **HTML, CSS, and JavaScript** for mobile, tablet, and desktop.
- Developed **interactive UI features** including form validation, real-time feedback, and dynamic DOM updates.
- Created reusable **React components**, applying state management and single-page navigation concepts.
- Integrated **REST APIs**, handling loading and error states for reliable data rendering.
- Refined UI and code quality based on feedback, focusing on **clarity, responsiveness, and consistency**.

## PROJECTS

**FOOD DELIVERY MOBILE APP**

Built a polished, TypeScript-first food-delivery mobile prototype using **Expo (React Native)** demonstrating end-to-end app design: reusable, typed UI components, responsive layouts, and client-side state management for smooth user interaction.

**Stack:** TypeScript · Expo (React Native) · NativeWind (Tailwind) · Zustand/Context

**Repo:** <https://github.com/kikiolaoluwa09/food-delivery-app->

**HABIT TRACKING MOBILE APP**

Built a TypeScript-first habit-tracking mobile prototype demonstrating end-to-end app design: reusable, typed components, predictable state management, and persistent storage for habits and completion data.

**Stack:** TypeScript · React Native · Context-based state management · Modular folder structure

**Repo:** <https://github.com/kikiolaoluwa09/Habit-Tracking-App>

**THREADS CLONE (SOCIAL FEED MOBILE APP)**

Built a mobile clone of a social feed platform using **React Native** and **TypeScript** with **Supabase** backend. Developed reusable UI components, responsive layouts, and thread-style feed interactions, demonstrating component structuring, state management, and mobile-first design principles.

**Stack:** TypeScript · React Native · Supabase · NativeWind · Context/Zustand for state

**Repo:** <https://github.com/kikiolaoluwa09/threads-clone>

**NETFLIX-STYLE STREAMING WEB UI**

Built a responsive Netflix-style streaming UI using **React** and **Vite**, focused on modern, component-driven development. Developed modular UI components (media cards, hero banners) and implemented a clear folder structure with tooling for clean code and fast builds.

**Stack:** React · Vite · JavaScript · HTML · CSS · ESLint

**Highlights:** Reusable media and layout components · Grid-based responsive design · Production-ready project structure

**Repo:** <https://github.com/kikiolaoluwa09/Netflix-Clone-Reactjs>
