KIKIOLAOLUWA ADENIRAN

OBJECTIVE

Frontend / Mobile Development Intern experienced in building responsive mobile and web interfaces with **React** and **React Native**. Delivered production-ready projects including a **React Native notes app**, **expense tracker**, and **React-based Netflix clone**, showcasing strong **component architecture**, **state management**, and **UI polish**. Effective at **debugging UI issues**, **refactoring for maintainability**, and shipping **clean, user-first mobile experiences**.

SKILLS & ABILITIES

React Native · React.js · JavaScript · TypeScript · API Integration · Tailwind CSS · HTML/CSS · Git & GitHub · Google Lighthouse (Performance & SEO)

EXPERIENCE

Frontend Engineering Intern — Rex Health (Remote)

June 2025 – September 2025

- Maintained and enhanced the company's **mobile application UI** using **React**.
- Resolved **20+ UI bugs** and layout inconsistencies, improving visual stability across key mobile screens.
- Implemented responsive UI across **3+ device breakpoints**, enhancing on mobile and tablet.
- Collaborated with senior developers to align UI with design standards, improving overall user experience consistency

Frontend Engineering Intern — Codveda (Remote)

September 2025 – October 2025

- Developed **5+ responsive web pages** optimized for mobile, tablet and desktop screens.
- Built dynamic UI features including form validation and real-time DOM updates, improving user input accuracy.
- Created reusable React components, reducing development time for new features.
- Integrated **REST APIs**, handling loading and error states for reliable data rendering.
- Refined UI and code quality based on feedback, focusing on **clarity, responsiveness, and consistency**.

B.Sc. Computer Science

Landmark University, Omu-Aran, Kwara State

November 2024 – Expected October 2029

PROJECTS

FOOD DELIVERY MOBILE APP

- Engineered a mobile app with **12+ reusable UI components**, reducing code duplication
- Implemented state management for **multiple user flows (cart, checkout, navigation)**
- Built responsive layouts improving usability across different screen sizes

Stack: TypeScript · Expo (React Native) · NativeWind (Tailwind) · Zustand/Context

Repo: <https://github.com/kikiolaoluwa09/food-delivery-app->

HABIT TRACKING MOBILE APP

- Developed a habit tracking system with **persistent storage for daily activity data**
- Designed modular architecture enabling easy feature expansion
- Managed application state using Context API for predictable data flow

Stack: TypeScript · React Native · Context-based state management · Modular folder structure

Repo: <https://github.com/kikiolaoluwa09/Habit-Tracking-App>

THREADS CLONE (SOCIAL FEED MOBILE APP)

- Built a social feed application supporting **dynamic post rendering and user interactions**
- Integrated Supabase backend for **real-time data synchronization**
- Developed reusable components for scalable UI development.

Stack: TypeScript · React Native · Supabase · NativeWind · Context/Zustand for state **Repo:**

<https://github.com/kikiolaoluwa09/threads-clone>

NETFLIX-STYLE STREAMING WEB UI

- Developed a responsive web UI with **multiple content rows and dynamic media sections**
- Built modular components improving scalability and maintainability
- Optimized development workflow using Vite for faster builds

Stack: React · Vite · JavaScript · HTML · CSS · ESLint

Highlights: Reusable media and layout components · Grid-based responsive design · Productionready project structure

Repo: <https://github.com/kikiolaoluwa09/Netflix-Clone-Reactjs>
